

Sense and soul of our company is shipbuilding. Since our founding in 1872, we have designed and built more than 750 ships. These include many unique and complex projects, such as submersible heavy cargo vessels, seismic vessels, well intervention vessels, state-of-the-art RoRo ferries or naval strategic support vessels. Our strength lies in the design and implementation of customized solutions for owners and operators with high expectations of reliability and optimal functionality. With the goal of becoming a leading digital shipyard with an integrated value chain, we are looking for competent and dedicated team players (M/F/D) who want to make a contribution to the future success of our company.
